HERE IS AN EVERGREEN COLLECTION WITH A BANG

THESE SIX EVERGREENS, ALL DIFFERENT . . . (Shipped Balled and Burlapped) **\$12.50**
AND AT AN EXCEEDINGLY LOW PRICE

Our President Mr. Mayo inspecting a field of these Evergreens at Glenwood Nurseries.

Each and every one suitable for planting around your house foundation or to develop as individual specimens on the lawn. One of each as follows:

JUNIPERUS PFITZERIANA. A spreading graceful habit with silvery green color. Size: 12-15-inches spread.

AMERICAN ARBORVITAE. Splendid pyramid with broad base. Bronzy winter coloring. Size: 18-24-inches tall.

TAXUS CUSPIDATA (Japanese Yew). Spreading variety with attractive dark green foliage. A mature plant in the fall. Sparkles with its myriad bright red fruits. Size: 10-15 inches spread.

Only because we have a large surplus of these Evergreens are we able to offer this Collection of Six, all different plants, balled and burlapped for the price of \$12.50.

IRISH JUNIPER. Branches upright, densely covered with dark green foliage. Spiral in growth. Size: 15-18 inches tall.

GOLDEN GLOBE ARBORVITAE. Globular in form and of low dense growth with golden yellow foliage. Size: 18-24 inches tall.

PYRAMIDAL ARBORVITAE. Pyramidal in form. Retains bright green color throughout the winter. Size: 2 to 3 ft.

DAZZLING COLORS IN AUTUMN EARLY FLOWERING CHRYSANTHEMUMS

Flowers From September 'Till Frost

These Should Make Your Garden a Riot of Color Next Fall

Their dashing, dazzling, brilliant colors are a refreshing contrast to the dull drab of summer shrubs that are through blooming. These Chrysanthemums will bloom long and persistently next Fall if planted this Spring.

Don't miss this Golden Opportunity to have a real Flower Show in your own garden next Fall.

The varieties offered are large flowered, measuring from 2 to 4 inches in diameter and come into bloom from one to two weeks earlier than usual varieties, all of them coming into bloom before the middle of October, staying in bloom until frost, giving a magnificent and rich display color.

12 Of The Following Varieties For

Plant one of each of these 12 outstanding varieties Chrysanthemum this Spring. Extra heavy 2-year roots. **\$5**

VIVID. Rich deep amaranth red changing to wine-red overlaid with velvet sheen.

GYPSY QUEEN. Crimson maroon. A lovely aster type with pastel finish blushed with crest of soft yellow center. September.

EXCELSIOR. Yellow. Early October.

MRS. A. PHILLIPS. Lavender-pink. Late September.

RUTH CUMMINGS. Reddish bronze with terra-cotta shading. Early October.

FRANCES WHITTLESEY. Rich bronze and garnet. September and October.

PINK CUSHION (Amelia). Very compact and early free flowering. Light shell pink. Early October.

Beautiful as Cut Flowers Too

JEAN TREADWAY. Large decorative type, rose-shaded lighter. Very free bloomer. Late September.

JEAN CUMMINGS. Large pure white flowers, shaded yellow and blushed at center of buds. Late September.

L'ARGENTUILES. Reddish bronze. Very free. Early October.

EARLY BRONZE. Terra-cotta. Early October.

BARBARA CUMMINGS. Large, clear, double yellow flowers. Very late August.

California PRIVET HEDGE

The standard American Hedge Plant and the most widely planted. A universal favorite with its rapid upright, dense growth and attractive glossy green foliage. Withstanding almost any amount of shearing. Widely planted here in cold wintered Northern New York. It is very hardy. Plant our bushy plants 10 inches apart.

PRICE: 18-24 Inch Size Branched Plants
25 PLANTS for \$3.00
50 PLANTS for \$5.50
100 PLANTS \$10.00

California Privet at Glenwood Nurseries. Notice the distance between rows. See clean cultivation. This costs less money but we sell "Glenwood" high quality stock as cheap as the others. Charge for half as good.

Our Exquisite ROSE GARDEN COLLECTION

Special
10 Varieties

All Popular
All Different
For Only

\$9.95

Why Not a Rose Garden
For This Summer?

TALISMAN. Probably the most popular rose in America today. A magnificent multi-colored rose of golden Apricot-yellow, blood orange deep pink and old gold. The most gorgeous assemblage of colors in one flower ever presented in a rose. Very fragrant and blooms all summer.

RADIANCE. We say is the best pink rose ever introduced. A brilliant carmine pink with salmon pink and yellow shadings at base of petals. It is the world's standard of perfection among pink roses and has been awarded prizes and medals galore.

MME. EDOUARD HERRIOT. Winner of the \$50,000 prize offered by the London Daily Mail. Coral buds and shaded yellow. Copper orange and tinted yellow and scarlet. Wouldn't you just love to have one of these beauties blooming in your garden all summer? Beautiful bud and exquisite colorings.

GRUSS AN TELITZ. (Crimson Hermosa). The Clusters of fine long buds and magnificent bright crimson flowers, with fiery red shading, make a brilliant show all summer and its beauty is still further enhanced by the lovely green foliage which in the young growth is a dark rich bronze. It is very fragrant, free-blooming, hardy and vigorous.

MARGARET McGREDY. A rose of rare charm both in bud and open bloom. The color is a most unusual shade being orange-scarlet blooming from June until hard frost. The long pointed opening buds have a delightful fragrance.

JOANNA HILL. Buds are long pointed, opening to well formed flowers of clear yellow. The flowers are produced on long erect stems making it a very desirable variety for cutting. One of the best yellow roses.

CRUSADER. Flaming crimson red flowers. The pointed buds are produced on long stiff stems. This all summer bloomer would be outstanding in any garden.

BETTY UPRICHARD. Orange-carmine on outside petals; burning copper-red buds, in lasting blooms all summer and fall. The color of this rose is in a class by itself. Continuous bloomer and extremely fragrant.

SENSATION. Scarlet-crimson. Another outstanding variety that blooms continuously for four months of the year. The flowers are brilliant scarlet-crimson. Long pointed buds produced on long erect stems. Extremely desirable for cutting and retain their flashy color for a long time.

MRS. CHARLES BELL. Clear shell-pink without fading. This exquisite shade has never been matched in any of the new roses. Deliciously fragrant, this delightfully different rose should and will be in your garden if you order this Special Collection.

Every plant out-door grown, and has been in bloom in the nursery last summer. \$9.95 spent on this collection should give you as much pleasure and satisfaction as \$25.00 spent on anything else.

Every Plant Listed In
This Collection Is:

- Out Door Grown
- Bloomed Last Summer
- Sturdy Bushes
- Lots of Blossoms

Glen's Heavy Yield STRAWBERRY PLANTS

\$3.95 PER 100
For Quickest Fruiting

We have tested scores of varieties of Strawberries and have selected the following as being equal or superior to any varieties we have ever tested and we know you will be perfectly delighted with the results from any or all of these varieties that you may plant.

SENATOR DUNLAP (Mid-season). The Senator Dunlap is an old standard variety which has been successfully grown for many years. It is very hardy and produces enormous crops of excellent quality berries. The Senator Dunlap is one of the most favored varieties in the North, being very resistant to frost injury. It is a heavy producer of large brilliant red berries of excellent fine flavor. Be sure and include Senator Dunlap in your planting this Spring.

Price: **\$3.95 Per 100**

PREMIER (Early). King of the early berries. The standard early berry by which all other varieties of Strawberries are judged. Holds all records of big crops. Premier fruits extra early. It is a heavy yielder. The berries are large bright red and of fine flavor. Fine for canning and preserving because it holds its color and shape well.

Price: **\$3.95 Per 100**

DORSETT (Early). Vigorous plant that produces firm rich red berries of tasty dessert quality. This heavy yield of finer fruits is a sure cropper. So rich in flavor that many growers are digging out other varieties and replanting with Dorsett. The berries are dark red in color of a brilliant hue. Try it.

Price: **\$3.95 Per 100**

AROMA (Late). No late berry that we have ever sold comes as near being a perfect variety of Strawberry as does the Aroma. The berries are firm, bright and red through and through and of enormous size. It is an excellently heavy cropper. Stands drought well and grows in almost any soil.

Price: **\$3.95 Per 100**

MASTODON (Everbearer)

Ripe Strawberries in 90 days with Glen's Quality Mastodon plants. A heavy yield, both spring and fall, of fine quality berries which are moderately firm, large and luscious in taste.

PRICE: **\$7.50 per 100**

BARBERRY THUNBERGI HEDGE

THE HEDGE OF
BEAUTY—DENSITY—
PROTECTION

THE HEDGE
EVERLASTING—THE
BEST OF ALL

From Christmas
to Christmas
Every Day in the Year
Barberry is Beautiful

In the early spring the leaves are a soft shade of green, then as summer comes they turn to a deep glossy green. Later on they assume shades of crimson and brown or bronze-green.

ITS AUTUMN COLOR IS VERY BEAUTIFUL. Its berries are brilliant attractive and since the birds will eat them only as a last resort, they frequently hang on until spring.

Left unpruned, it makes the most beautiful hedge grown, or where formal effect is desired repeated pruning will make a dense, impenetrable hedge. The plants we offer have been transplanted. They are well branched, well rooted and planted one foot apart will produce immediate effect.

Price **\$25.00 per 100**

Trained on an Arbour

PAUL'S SCARLET CLIMBING ROSE

INTENSELY RED—SPECTACULAR BEAUTY
Its Scarlet Alight—Fiery—Dazzling

When in bloom its loose cluster of from 5 to 15 blooms of attractive flowers literally cover the plant. A great spectacular show is made even by a single plant. Can be trained on fence, stone walls, pillars, pergolas and porch trellises for shade, also against the walls of buildings.

PRICE for Two Year Old Blooming Plants

\$1.50 each

Rose Bushes are scarce, better order to-day.

FRENCH PUSSY WILLOWS

BEAUTIFUL SUMMER
AND WINTER

THE ONLY OUTDOOR SHRUB GROWN FROM WHICH YOU CAN CUT BOUQUETS DURING WINTER MONTHS

BUDS AND BLOOMS VERY LARGE

The buds or catkins are from one to two inches long after they come out in bloom and make a very dainty yellowish pink and silvery bouquet.

FINEST WINTER BOUQUETS

The branches can be cut in December, January or February, placed indoors in a vase of water and they will at once burst into bloom. When they are in full bloom they can be taken out of the water and they will retain their beauty for months.

PRICE:—(Size 2 - 3 Ft.)

FRENCH PUSSY WILLOW BUSHES

\$1 each

\$9 per 10

IT MAKES FINE TALL HEDGES OR SCREENS

These plants will fit in any landscape planting and should be planted on home grounds everywhere. They can be used as a background like any tall shrub such as the Lilac or Snowball. They can be used as tall hedges or screens and should be planted about four feet apart for this purpose. Planted alone, the branches cut each winter, they make a beautiful round shrub and ornament to any home grounds.

MOST INTERESTING PLANT FOR THE HOME GROUNDS

Hall's EVERGREEN HONEYSUCKLE

Is your planting problem an unsightly bank? Is it hard to make grass grow. Does the bank wash badly after hard rain? By setting these plants 2 ft. apart each way they will cover the bank with a beautiful velvety carpet the first season.

AND ALSO DESIRABLE ON A TRELLIS OR ARBOR

Its robust tropical growth and sweetly scented white and yellow flowers make it a most satisfactory plant for the purposes described.

PREVENTS STEEP BANKS FROM WASHING

In our landscape work some of the best results have been obtained with Hall's Evergreen Honeysuckle. No bank is too steep to beautify with this old-fashioned favorite. The McKeesport Hospital at McKeesport, Pa., is located on a steep hill. It was difficult to make grass or anything grow. Our Landscape Architects were called into the picture. We used 5000 Hall's Evergreen Honeysuckle planted 2x2 and it did the trick. The Westminster College at New Wilmington, Pa., had practically the same problem. It costs money to cut grass on steep banks and to cut the cost of upkeep on these banks we used more than 6000 Hall's Evergreen Honeysuckle and it has accomplished the desired result.

Evergreen Honeysuckle—
The Thing for Banks

\$4.00 per 10, \$8.25 per 25, \$15.00 per 50, \$25.00 per 100

Genuine North China Strain

CHINESE ELM Plant This Spring and GAIN A YEAR

IF YOU WANT QUICK SHADE OUR NORTH CHINA STRAIN OF CHINESE ELM
IS LITERALLY "GREASED LIGHTNING."

OUR TREES WILL GIVE YOU QUICK SHADE

WHO WANTS TO WAIT 10 YEARS FOR SHADE THAT MAY BE HAD IN 5 YEARS?

It Is The Speed Tree—It Grows 40 to 50 Feet
In 5 Years

—Of Course You Want Quick Shade—Of Course You Want Immediate
Effect—Chinese Elm Will Give You Both—Our Chinese Elm Will Give
You The Same Results It Has Given To Thousands of Other Customers.

From C. D. Madden, Clarksville, Ohio

"About 4 years ago we bought a 6-ft. Chinese Elm from you which has
now reached the height of almost 30 ft. Everyone comments on its beauty
and how fast it has grown."

From Mr. Geo. Simmons, 70 Mount Pleasant Ave., Troy, N. Y.

"I have one of your Chinese Elms which I purchased about 3 years
ago. It has grown splendidly and makes a great deal of shade. The tree is
now almost 28 ft. tall."

From Mrs. C. Frank Dolman, 1124 Beaver St., Parkersburg, W. Va.

"We bought 2 Chinese Elms from your nursery in Spring, 1932. They
are now large, fine shade trees and admired by everyone."

From W. E. Straup, Circulation Dept., "The Farmer's Guide,"
Huntington, Ind.

"We already have 20 of your Chinese Elm trees on our place and like
them very much. They are all you claim for them."

The small tree shown on the right is an American Elm planted in 1917.
It was 6 to 8 feet high when planted. The large tree on the left is the
North China Strain of Chinese Elm planted in 1918 when but three feet
tall. The picture was taken in August, 1930. The Chinese Elm is twelve
years old and the American thirteen years old. These trees were planted
by Mr. W. E. Guthrie, Bridgeport, Nebraska, who supplied the photograph.
The American Elm has been planted a year longer and was twice as
large as when planted, but the Chinese Elm has considerably outstripped
it in growth.

From E. C. Holt, 702 North Carolina Bank and Trust Bldg., Burlington,
North Carolina.

"Please send me 10 Chinese Elms 5-6 ft. Please give me good selections
as I want most of these for my neighbors. We are amazed at the growth
of the one I bought from you several years ago."

From Mrs. Geo. R. Taggart, 613 Maryland Ave., Adams, Pa.

"My Chinese Elm is growing beautifully and is a most graceful and
beautiful shade tree."

Not only is the North China Strain of Chinese Elm an extremely
rapid-growing tree but it has none of the undesirable root char-
acteristics of the Poplar. It is strictly an Elm, being as hard as an
Oak and as graceful as the Cut Leaf Birch. It thrives from
Saskatchewan to the Gulf. Hot or cold, good soil or poor, it
makes no difference. The Chinese Elm is easy to transplant and
grows like the "Old Harry."

From H. R. Clark, Adrian, State
Bank Bldg., Adrian, Mich.

"I want to take this occasion to
tell you the Chinese Elm which I
purchased from you 4 or 5 years ago
has grown from a tree 4 to 5 ft. in
height to a large tree. I will not
dare to give you the size but it is
a wonderful tree and already affords
a nice amount of shade."

From Royal D. Robinson, D. D. S.,
818 Colonial Bldg., Canton, Ohio

"Please find an order and check
enclosed. May I also state that I
have never seen Elms that compare
in any way with some Dr. J. M. Ales
of this city got from your nursery.
They are marvelous compared to
some local Chinese Elms. I hope mine
turns out as well."

PRICES FOR CHINESE ELM:

4-5 ft. Size	\$1.50 each; \$13.50 per 10
5-6 ft. Size	2.00 each; 17.50 per 10
6-7 ft. Size	2.50 each; 22.50 per 10
7-8 ft. Size	3.00 each; 25.00 per 10
8-10 ft. Size	3.50 each; 30.00 per 10

Our Chinese Elm, the 3rd summer, planted on the estate of W. J.
Wilkinson, Esq., N. Y. Pictured at Right

We are going to call your attention to this matter of there being
two strains of Chinese Elm in this country, the NORTH CHINA
STRAIN, introduced by the United States Department of Agriculture
through their China Station in California and the Nanking strain.
Ours are the GENUINE NORTH CHINA STRAIN. The Nanking strain
does not do the same as the North China strain here in the East.

THE TREE OF MANY PURPOSES LOMBARDY POPLARS

Rapid Growing Trees Used for Windbreakers, Street Trees and
Ornamental Planting. Thrive in Any Soil. Thousands of Lombardys
are Planted Every Year.

They add to any landscape, catching the eye from a far distance. We know
of no tree grown that can give the tall, slender, columnar effect so much
desired in certain landscape treatments as the Lombardy Poplar.

One of the most rapid growing trees we offer. Their great height, dense
slenderness and sombre silhouette against the sky line, creating an im-
pressive picturesque old-world effect.

Grows from 40 to 60 ft. in height. It is extensively planted in fine estates,
along driveways and for backgrounds. Its branches are crowded all grow-
ing upwards. Fills a place that no other tree can fill.

The selective appreciation of trained landscape builders is getting this
fine type into much more general use. Old trees which were thoughtfully
placed, are outstanding landmarks, today.

THE LOMBARDY POPLAR

Planted 8 ft. apart makes an excellent hedge or windbreak. Why should
you waste through snow when you can grow a fine windbreak in 2 or 3
years by planting.

PRICE --- ALL TREES LOW BRANCHED

BRANCHED	EXTRA LARGE TREES
6-8 ft. each \$1.00 8.50 per 10	12-15 ft. size for immediate effect.

Ideal for Most Any Landscape

"THE FLOWERS THAT BLOOM IN THE SPRING TRA-LA" DELIGHTFUL PERFUME
FILLS THE AIR WHEN THE FLOWERING CRABS ARE IN BLOOM IN THE SPRING

OUR FINEST FLOWERING TREES

Spring is really here when you see the gorgeous Flowering Crabs in bloom filling the
warm Spring air with their delicious fragrance and that is not all. Late in the
Summer the branches are sparkling with delightful fruits, some red, some yellow,
some purple, some green.

NO TREES COULD BE MORE LOVELY
THIS SUMMER IF YOU PLANT
THEM THIS SPRING

All of them are hardy, thrive almost everywhere and in a wide range of soils and
exposures. We offer for Spring a quantity of older and larger trees which have
been grown expressly for landscape purposes to produce immediate effect. These
trees are 5-6 feet, are now well matured, and we have selected three very choice
varieties. We give you brief descriptions of these three desirable varieties we have
selected for this collection as follows:

PRICE: \$6⁰⁰ for 3
\$2.50 EACH SOLD SINGLY

NIEDZWETZKYANA. Sometimes called the red-veined Crab. Red to purple foliage,
dark buds and flowers, with large purple fruits, with red flesh. The fruits are
edible and make delicious jelly. We do not know where you could find 3 such
delightful flowering trees for the lawn, than these three.

ARNOLDIANA. Was originated in the Arnold Arboretum at Boston and was evidently
a seedling from some of the many beautiful varieties which are planted here.
The semi-double flowers are pink and drop gracefully in long stalked clusters. In the
autumn the tree is adorned with pendulous clusters of waxy yellow fruits about
the size of a cherry. Its habit is compact and it is seldom more than 10 to 12
feet high.

RED SILVER. One of the most ornamental varieties with striking dark leaves
compulsively marked with light silver veins. It produces an unbelievable abun-
dant of white flowers with sparkling yellow anthers, followed by glittering scarlet
fruits which hang on almost all winter. It is a good ornament to any planting.
The tree is very vigorous and grows to a height about 15 feet.

3 FOR \$6

A MAGNIFICENT SHRUB COLLECTION

In large-size specimen plants. Grown expressly for Landscape
purpose to produce immediate effect.

Pine for foundation planting or in groups or as single specimens
about the lawn.

HYDRANGEA PEE CEE. The hardiest and most popular Hydrangea. In July
and August massive plumes of white flowers, later changing to pink,
bend the branches with their weight.

RED BRANCHED DOGWOOD. Very conspicuous and ornamental, especially
in Winter when the bark turns to blood-red.

FORSYTHIA FORTUNEI. Grown upright; foliage deep green; flowers bright
yellow, appearing before the leaves. Very showy.

SWEET SYRINGA. In early June. Its fragrant, pure white flowers in dense
clusters, so numerous as to bear the branches down with flowering. One
of the best.

PIREA BRIDAL WREATH. Beautiful white flowers, double and very
profuse Blooms in May. Foliage, scarlet in autumn.

CORAL BERRY. A low growing, graceful shrub. Its fruits are red, and the
smaller red berries cluster in thick ropes along the weighted-down
stems. August. Very desirable.

AN EVEN HALF DOZEN OF THE
FINEST FLOWERING SHRUBS IN THIS
EXTRA LARGE LANDSCAPE SIZE FOR \$4.75

The Beautiful White Flowering DOGWOOD TREES

BLOOM IN MAY BEFORE THE LEAVES APPEAR — PLANT THEM THIS SPRING

Small trees of great hardiness and floral
beauty, thriving in most any soil or ex-
posure. The White Flowering Dogwood
especially is recommended as one of the
showiest of Flowering Trees. Some of the
most enchanting results in ornamental
plantings are attained by the liberal use
of these valuable subjects. Growing to a
height of 15 to 25 feet they are a mass

of bloom in May before the leaves appear.
Ours are specimen plants being strictly
nursery grown and are far superior in
every respect both in color, form and root
system to trees collected in the woods
that are frequently offered by nursery-
men. Every tree we offer is a nursery
grown tree and at the lowest price on
record.

WHITE FLOWERING DOGWOOD—(Cornus Florida)

One of the most beautiful Flowering
Trees. A small delightful tree with up-
right or spreading branches. Leaves oval
bright green turning scarlet in foliage,
changing to gorgeous red in Autumn.

Size 4-5 ft. each \$2.00
17.50 per 10

Fruit following the blossoms is a brilliant
red in the Fall and hangs well into the
Winter. Birds are especially fond of it.
One of the finest Flowering Trees for the
lawn and especially good in a shady loca-
tion where it does well.

Size 5-6 ft. each \$3.00
25.00 per 10

The Gorgeous Autumn Colorings of the Foliage are Magnificent. A Dogwood Tree Is One Immense Bouquet.

BURBANK'S GIANT Crimson RHUBARB

Introduced by the late Luther Burbank. It is not unusual for a single
stalk of this wonderful "Pie Plant" to weigh a pound.

For many years extensive experiments were carried on by Mr. Burbank
for the improvement of the rhubarb. From crossing of the Giant
Perpetual with the best European and American varieties some remark-
able giant, early and fine flavored varieties were produced—one of
them was Burbank's Giant Crimson.

EXTRA LARGE, of fine bloom, and crimson color, this variety of
rhubarb should be in every garden
and will be when known. Plant a few this Spring along side that you now
have growing in your garden and note the difference. Burbank's Giant
Crimson is superior in size and quality to any variety we have ever
tasted. It is an early variety without being in the least tough or stringy,
with a mild sub-acid flavor. Plant this Spring in good garden soil,
mature well and have delicious pie and sauce next summer.

PRICE: STRONG ROOTS,

50¢ each - \$4⁵⁰ per 10

Super-Size Fruit Trees Are Grown Expressly To Save You Time

PLANT SOME OF OUR BLUEBERRIES THIS SPRING

Ours are Not the Ordinary Blueberries, but the Extraordinary—Ours are Cultivated Nursery Grown Hybrids that Produce the Big Luscious Berries and Plenty of Them

Can you imagine anything more satisfactory than having delicious blueberries growing in your own garden? No doubt you have enjoyed this wonderful fruit on the hotel or restaurant menu, served with cream for breakfast or as blueberry pie or dumplings for luncheon or dinner. This is a fruit that satisfies for three meals a day and ten plants are quite sufficient to supply the average family with blueberries. They can be used freely for making breakfast muffins or preserves.

CULTIVATED BLUEBERRY PLANTS

The largest blueberries for your table. Plump, tender, practically seedless and the size of grapes and far superior to the wild blueberry in flavor. With sugar and cream or for pies and preserves they are delicious, nor can the ornamental value of these cultivated blueberries be overlooked. During the summer the foliage is deep, satiny green and against this background hang clusters of berries royal in their magnificence. In the autumn the leaves turn to a beautiful crimson-bronze, with red branches during the winter. We offer the following varieties:

RUBEL. Berries are fine blue color and ready to pick the second week in July.
 CABOT. Large berries. Have a delicious sub-acid flavor.
 PIONEER. Produce heavy crops of berries of medium blue color and fine flavor.

Try Ten Plants This Spring. Fruiting Season Early July 'till Late Summer

Sturdy Branched Bearing BLUEBERRY PLANTS

FOR QUICK AND HEAVY BEARING
 BIG CLUSTERS OF BIG BERRIES

CULTURAL DIRECTIONS

Blueberries require an acid soil to produce the best results. This is prevalent in many sections of the country. Where your soil is not acid, we suggest the following method to get the most from your plants. Choose a well-drained location, easily supplied by water during the dry summer months. Blueberries do best with full sun, although they will grow and produce fruit in partial shade. In order to get the proper acid condition to your soil, mix partly rotted leaves with the soil of your garden. A heavy mulch each fall of partly rotted leaves will maintain the acidity of the soil. Do not remove this mulch, but let it remain throughout the year. Never use manure or compost near a blueberry plant. No pruning is necessary except as a branch may become damaged or stop bearing. Water your plants well the first year, soaking the ground two or three feet away from the plants.

\$2.75 each, \$25.00 PER 10 PLANTS

(Buy Two or More Varieties for Cross Pollination)
 BLUEBERRIES—ACTUAL SIZE

BOYSENBERRIES

THE MARVEL BERRY... IT IS A MARVEL IN SIZE, COLOR AND FLAVOR... A MARVEL TO EAT... PLANT SOME BOYSENBERRY PLANTS THIS SPRING

PRICE FOR THESE STRONG 2-YEAR TRANSPLANTS: **\$3.00 PER 10; \$25.00 PER 100**

These Four Berries Were Part of 18 That Weighed 11 Ounces

Enormously large, 2 year transplants, guaranteed Glenwood grown, and actually fruiting last summer—bearing plants—they are delicious—you said it, in any way you want them. Fresh with sugar and cream, in pies, jams, jellies, or the juice is a delicious drink when chilled.

Plant Some Boysenberry in Your Victory Garden This Spring VERY HARDY. Withstanding many degrees below zero without injury.

IMMENSE PRODUCTION. One hundred boysenberry plants have produced fruit that sold for \$310.10.

DELICIOUS FLAVOR. The boysenberry has a distinctive flavor altogether different from any other berry.

LONG SEASON. Picking season from 8 to 10 weeks. JUICE. Eight pounds and four ounces of juice extracted from 10 pounds of boysenberry.

You will be astounded at the amount of fruit you get from a few plants.

Knott's Famous Tea Room at Buena Park, California, specializes in boysenberry recipes. These are always on the menu—Boysenberry and cream, Boysenberry sherbet, Boysenberry pie, Boysenberry punch.

DON'T MISS THIS OPPORTUNITY TO OBTAIN FOR SPRING PLANTING A QUANTITY OF THESE PLANTS.

PLANT FILBERTS

IF FILBERTS ARE YOUR FAVORITE NUTS—THEN GROW THEM YOURSELF IN YOUR OWN GARDEN. — EASY TO GROW — EARLY TO BEAR — EASY TO HARVEST — DELICIOUS TO EAT

PLANT THEM ON THE LAWN AS ORNAMENTAL SHRUBS

They not only bear heavily but they possess many attractive and ornamental qualities. In Summer and Autumn the fringed or fluted fruit husks add beauty and interest to the heavy laden bushes. The nuts are sweet and delicious. They thrive in almost any soil. If you do not wish to plant them commercially for profit, plant a few on the lawn not only for nuts but for ornamental effect. Plant them in the garden. Plant an acre of them. Set them 18 ft. apart or 135 trees to the acre. We offer for Spring shipment plants that should produce nuts in fair quantities next Fall. The following are among the finest varieties of Filberts grown.

BARCELONA. A large round nut, fully self-husking. Rich in flavor. Kernel uniform in size and very prolific.

DUCHILLY. A long nut of the finest quality. Very rich in flavor. Tree a strong upright grower.

DAVIANA. A long striped nut of the DuChilly type. A heavy producer and the nuts are rich in flavor and of the highest quality.

It is always best to plant one or two varieties for pollination. We offer the above varieties in the following sizes:

3-4 ft. \$2.00 each \$18.50 per 10 \$165.00 per 100
 4-5 ft. 2.50 each 20.00 per 10 185.00 per 100

NUTS ARE FOOD—PLANT MORE FILBERTS

RED BERRIED WINTERBERRY

IT IS A DECIDUOUS MEMBER OF THE HOLLY FAMILY

One of the best, if not the best hardy shrub for winter attraction.

In certain sections it is called "Fire Bush" because of its bountiful displays of brilliant red berries showy during the winter and which are not eaten by birds.

Decidedly attractive when cut and used with Greens for indoor Christmas decorations.

Makes a spreading shrub about 6 feet tall. Particularly attractive planted 5 to 6 ft. apart in groups.

Order two or more of these attractive shrubs for Spring planting.

We recommend two or more to bring in close proximity the pistillate and staminate forms to insure a bountiful display of berries.

Size: 2-3 Ft. **\$2** each 3 Plants for \$5.00

LATHAM... THE BIG GIANT RASPBERRY

EARLY, HEAVY YIELD—EXCELLENT QUALITY—ABSOLUTELY HARDY—DISEASE RESISTANT—EASY TO GROW, SENSATIONAL IN YIELD AND PROFIT

EVER CROW ASPARAGUS? IT IS AS SIMPLE AS A. B. C. — PLANT MARY WASHINGTON ASPARAGUS

For health's sake, eat Asparagus, Mary Washington Asparagus. Cut it in your garden, cook it, and eat it the same day. Fresh Mary Washington Asparagus, of full health, rich in minerals and vitamins, too.

START A BED THIS SPRING—ORDER AT ONCE

Good Asparagus roots are not too plentiful this Spring. Plant in rows two feet apart, the plants one foot apart in the rows. Prepare a place of fine loamy soil to which has been added a liberal dressing of rich manure. For each row of plants dig a trench the width and depth of a spade. The plants are then set in the bottom of the trench at the proper distance, care being taken to properly spread the roots. The crown or top of the plant should then be covered with three inches of soil that has been mixed with a quantity of well rotted stable manure. As the new shoots burst through the soil, more soil should be added until the entire trench has been filled. The bed should be manured freely each Fall. An Asparagus Bed will last and should produce good results for at least twenty years. Now if you have decided to try it, plant the BEST VARIETY AND THAT IS—

MARY WASHINGTON THE VARIETY FOR YOU TO PLANT

There is no variety of Asparagus as good as the Washington and no strain of the Washington as good as the Mary. Mary Washington is the only asparagus worth planting and in our opinion it will soon be the only asparagus planted. Plant our extra large two-year old crowns and order now under this guarantee. If upon receipt of shipment you find the plants are not the finest and largest two-year Asparagus you have ever seen, wrap them up and return to us and we will refund your money without question, quibble, or controversy.

For the home or market, it stands ahead of all others in size, vigor, tenderness and quality.

INDIAN SUMMER EVERBEARING RASPBERRIES

FOUR MONTHS DELICIOUS RASPBERRIES—YOU NEVER TIRE OF THEM

Decidedly Superior to Any Other Everbearing Raspberry on the Market The Indian Summer is all Raspberry. It is red. It is juicy. It is delicious. It bears all Summer.

The New York State Agricultural Experimental Station at Geneva, N. Y., named this variety and this is what the New York State Fruit Testing Association at Geneva say about it—'Indian Summer is the first Fall bearing or so-called everbearing raspberry to be named by the Station.'

It is decidedly superior to the varieties of its class now in the trade, namely Rancore, St. Regis, Erskine Park, and LaFrance group of Fall bearing sorts. The berries are large, roundish, conic, slightly irregular, medium, red, rather soft, crumple very slightly and are good in quality. Summer crop ripens early or soon after June variety. The Autumn crop starts early in September and continues until a severe frost. The bulk of the Fall crop ripens during October. The plants are hardy at Geneva. Vigorous, above medium height, and bear a heavy crop.

Our Strong 2 Year Transplants of Indian Summer

Sell For \$3.00 per 10 just

\$28.00 per 100

The Association says that Indian Summer is superior to LaFrance. We have seen LaFrance priced at \$1.00 each or \$10.00 per 10. You buy Indian Summer from us in larger quantities, a far superior variety, at only \$3.00 per 10. Order a quantity today for Spring planting and pick fruit next summer and fall. Indian Summer Raspberries are the best plants you ever saw—they grow while you sleep.

GRAPES • Big, Juicy Grapes For Delicious Grape Juice, Wine, Jelly or Eating Fresh

Nothing quite so sure to grow, nothing quite so sure to bear, nothing quite so sure to please every taste. Nothing unusual for the large plants to fruit first year planted. Planted this Spring should produce fruit first season. Extra large, extra old, extra fine 3-yr.-old plants that should fruit next fall. Plant wherever you can find a spot 6 inches square. It has its likes, but never insists on them. With its roots in any odd nook

you can lead it away in any direction to provide a grateful shade for a restful seat. Wherever you go, north, east, south, and west, whether on hill or in valley, on poor soil or rich, you will find the grape generously giving of its bounty and loyal to its master whether he give it care or neglect.

Order now for shipment at proper time for planting in the Spring.

- CATAWBA (Red). Bunches large and loose. Berries large of coppery red color, becoming purplish when well ripened. Vinous, rich.
- CAMPBELL'S EARLY (Black). Berries large and handsome, nearly round, black with light purple bloom. Flesh tender, quality rich, sweet. Vigorous grower.
- CHAMPAGNE (Red). Very large; immense bearer, tender, juicy, sweet with a rich aromatic flavor. Its keeping qualities are superior. Fine for eating fresh or wine. A sterling variety.
- CONCORD (Black). Large and handsome, very hardy, productive, and reliable. One of the most popular market grapes, succeeding well over a great extent of country.
- DELAWARE (Red). Flesh rich, sweet, and of the best quality, equal if not superior to Delaware, ripens early. Productive and vigorous.
- LUCILLE (Red). Bunches very large and compact. Berries large, rich dark red, pulp sweet, delicious. Extremely hardy. Tremendous crop.
- NIAGARA (White). Bunches medium to large. Berry large, roundish, uniform skin thin but tough, pale green, changing to pale yellow with thin whitish bloom. Tender, sweet; ripens with the Concord.
- WORDEN (Black). Bunches large and handsome; berries larger than Concord and superior to that variety in flavor, vine healthy and hardy. A seedling of concord, ripening a few days earlier.
